ABSTRACT

Summarized in tabular form is statistical information on higher education in Iran. Twelve universities and 184 institutes of higher education are included, and the year covered is 1975-76. The total enrollment in that period was 151,905. Information is given on the type and location of institution and sex and field of study of students. The definitions and classifications of field of study adopted by UNESCO are used insofar as possible. (MSE)

Higher Education Statistics
in Iran, 1975-76

This manual is a summary of the statistical information collected and compiled by the Statistics and Information Unit (Institute for Research and Planning in Science and Education) regarding higher education. This summary of statistical report, however, does not contain all statistical data that have been reported in detail in the other side of this publication (published in persian).

In 1975-76, the total number of enrolments in 12 universities and 184 institutes of higher education reached to 151905 .

The following tables contain statistical data on such item as number of higher education institutions by type and location and students by sex and field of study.

The definitions and classifications of the fields of study set out in the Recommendation Concerning the International Standardization of Educational Statistics (adopted by the general conferance of UNESCO) have been applied as far as possible.

The classification of institutions (excluding Universities) is based on financial resources and revenues. They are as follow:

I) Autonomous Public Institutions:
These institutions of higher education are established by government legislation and receive their revenues directly from the government budget. They have financial and administrative autonomy.

2) Affiliated Institutions:
These institutions are, also, established by government legislation but they do not have financial autonomy.

They are subordinated to ministries or other government organizations and financially are dependent to these organizations.

other Institutions.

These institutions are established by charters issued by the ministry of Science and Higher Education. They are administred by private organizations and are not generally, entitled to financial support from the government, but some have, from time to time, received financial aids when necessary. The greatest part of thier budget comes from tuition fees which the students are required to pay.
